ABSTRACT

This study aims to determine the effect of customer experience and brand awareness of customer loyalty on the Lazada marketplace in Bandung City. The population in this study are people who use the Lazada marketplace in Bandung City. A total of 100 samples with the calculation of determining the sample using the Cochran formula. This sampling technique uses the Nonprobability Sampling approach, namely Purposive Sampling. Statistical analysis instruments used validity test, reliability test, classical assumption test, multicollinearity test, heteroscedasticity test, multiple linear regression analysis, correlation coefficient analysis, coefficient of determination analysis, t test, and f test with the help of SPSS software version 25. The results of the study show that customer experience and brand awareness are included in the "good" category and customer loyalty in the Lazada marketplace is included in the "good" category. The results of partial and simultaneous analysis of customer experience and brand awareness have a significant influence on customer loyalty in people who use the Lazada marketplace in the city of Bandung.
