ABSTRAK

Penelitian ini bertujuan untuk mengetahui pengaruh Suku Bunga Kredit dan *Non Performing Loan* (NPL) terhadap *Return On Assets* (ROA) pada PT. Bank Bjb, Tbk baik secara parsial maupun simultan.

Metode yang digunakan adalah metode deskriptif dan verifikatif dengan analisis Uji Asumsi Klasik itu terdiri dari bagian Uji Normalitas, Uji Multikolinearitas, Uji Heterokedastisitas, dan Uji Autokorelasi, Uji Analisis Regresi Linier Berganda, Uji Koefisien Korelasi, dan Uji Koefisien Determinasi kemudian dilakukan Uji Hipotesis melalui Uji Parsial (Uji t) dan Uji Simultan (F) dengan pengolahan data menggunakan SPSS 23.0.

Hasil penelitian ini menunjukkan bahwa secara parsial (uji t) bahwa Suku Bunga Kredit tidak berpengaruh positif dan tidak signifikan terhadap *Return On Assets* (ROA). *Non Performing Loan* (NPL) tidak berpengaruh negatif dan tidak signifikan terhadap *Return On Assets* (ROA). Sementara uji simultan (uji f), Suku Bunga Kredit, *Non Performing Loan* (NPL) tidak berpengaruh dan tidak signifikan terhadap *Return On Assets* (ROA) dengan besarnya kontribusi (R^2) 09,9%, nilai koefisien korelasinya sebesar 0,315 berada pada tingkat yang rendah.

Kata Kunci : Suku Bunga Kredit, *Non Performing Loan*, *Return On Assets*

**THE EFFECT OF INTEREST RATES AND NON
PERFORMING LOANS (NPL) ON RETURN ON ASSETS (ROA)
AT BANKS BJB, TBK**

ABSTRACT

This study aims this research the effect of Interest Rates and Non Performing Loans (NPL) on Return On Assets (ROA) at PT. Bank Bjb, Tbk either partially and simultaneously.

The method used is descriptive and verification method with the classical assumption consists of the Normality test, Multicollinearity test, Heterocedasticity test, and Autocorrelation test, Test of Multiple Linear Regression Analysis, the Correlation Coefficient test, Determination Coefficient test and then test the Hypothesis test through test Partial (t test) and Simultaneouslytest (F) by using a data processing SPSS 23.0.

The results of this study indicate that partially (t test) that the Credit Interest Rate does not have a positive and not significant effect on Return On Assets (ROA). Non Performing Loans (NPL) does not have a negative and not significant effect on Return On Assets (ROA). While simultaneous tests (f test), Credit Interest Rates, Non Performing Loans (NPL) have no effect and are not significant on Return On Assets (ROA) with the contribution (R²) 09.9%, the correlation coefficient value of 0.315 is at the level low.

Keyword : Rates, Non Performing Loan, Return On Assets
