**THE EFFECT OF LIQUIDITY, OPERATIONAL EFFICIENCY, CREDIT QUALITY AND CAPITAL ON PROFITABILITY AND THE IMPACT ON STOCK PRICES AT PT. REGIONAL DEVELOPMENT BANKS OF WEST JAVA AND BANTEN DURING THE PERIOD 2010 TO 2016**

***Abstract***

*The company's ability to maintain liquidity (Loan to Deposit Ratio), operational efficiency (Biaya Operasional Pendapatan Operasional), credit quality (Non Performing Loan) and capital (Capital Adequacy Ratio) must be considered carefully, because some of these variables can influence and contribute to the achievement of profitability (Return on Assets) values. This study aims to determine the effect of liquidity, operational efficiency, credit quality, and capital on profitability and its impact on stock prices. This research method uses a quantitative approach with path analysis. The source of this research uses secondary data. The data collection of this study uses documentation techniques. The sample of this study was 7 financial statements of PT. Regional Development Banks of West Java and Banten during the period 2010 to 2016 using purposive sampling techniques. The results of this study indicate that there is a significant effect between operational efficiency on profitability, while liquidity, problem credit and capital have no significant effect on profitability. In addition, there is no significant influence between liquidity, operational efficiency, problem credit and capital simultaneously to profitability. And there is no significant profitability on stock prices.*
