**ABSTRAK**

Penelitian ini bertujuan untuk mengetahui perkembangan dan pengaruh *Current Ratio* (CR), *Debt to Equity Ratio* (DER), dan *Net Profit Margin* (NPM) terhadap Harga Saham pada PT Jaya Agra Wattie Periode 2017-2022. Metode yang digunakan adalah metode deskriptif dan verifikatif dengan pendekatan kuantitatif. Data yang digunakan yaitu data sekunder yang bersumber dari laporan keuangan triwulan periode 2017-2022. Rancangan pengujian hipotesis dengan terlebih dahulu dilakukan uji asumsi klasik yang terdiri dari empat pengujian, yaitu uji normalitas, multikolinearitas, heteroskedastisitas, dan autokolerasi, persamaan regresi linear berganda, koefisien kolerasi, koefisien determinasi, uji t dan uji F. Hasil dari penelitian ini menunjukkan bahwa secara parsial *Current Ratio* (CR) dan *Debt to Equity Ratio* (DER) tidak berpengaruh signifikan Harga Saham, *Net Profit Margin* (NPM) secara parsial berpengaruh signifikan terhadap Harga Saham. Secara simultan *Current Ratio* (CR), *Debt to Equity Ratio* (DER) dan *Net Profit Margin* (NPM) berpengaruh signifikan terhadap Harga Saham. Besarnya pengaruh *Current Ratio* (CR), *Debt to Equity Ratio* (DER) dan *Net Profit Margin* (NPM) terhadap Harga Saham adalah sebesar 34,1% sedangkan sisanya sebesar 65,9% dipengaruhi oleh variabel lain yang tidak diteliti pada penelitian ini.

**Kata Kunci:** *Current Ratio* (CR), *Debt to Equity Ratio* (DER), *Net Profit Margin* (NPM), Harga Saham

**THE EFFECT OF CURRENT RATIO (CR), DEBT TO EQUITY RATIO (DER), NET PROFIT MARGIN (NPM) ON STOCK PRICE (CASE STUDY ON PT JAYA AGRA WATTIE TBK PERIOD 2017-2022)**

**ABSTRACT**

*This study aims to determine the development and influence of Current Ratio (CR), Debt to Equity Ratio (DER), and Net Profit Margin (NPM) on Share Price at PT Jaya Agra Wattie for the 2017-2022 Period. The method used is descriptive and verification method with a quantitative approach. The data used is secondary data sourced from quarterly financial reports for the 2017-2022 period. Hypothesis testing design by first conducting a classical assumption test consisting of four tests, namely normality, multicollinearity, heteroscedasticity, and autocorrelation tests, multiple linear regression equations, correlation coefficient, coefficient of determination, t test and F test. The results of this study indicate that partially Current Ratio (CR) and Debt to Equity Ratio (DER) have no significant effect on Stock Price, Net Profit Margin (NPM) partially has a significant effect on Stock Price. Simultaneously Current Ratio (CR), Debt to Equity Ratio (DER) and Net Profit Margin (NPM) have a significant effect on Stock Price. The magnitude of the influence of Current Ratio (CR), Debt to Equity Ratio (DER) and Net Profit Margin (NPM) on Stock Price is 34.1% while the remaining 65.9% is influenced by other variables not examined in this study.*

**Keywords:** *Current Ratio (CR), Debt to Equity Ratio (DER), Net Profit Margin (NPM), Stock Price*
